

Integrated Management System Policy

- To provide and maintain well-designed facilities, good machinery, operation and working conditions and set a high standard of Integrated Management Systems
- To comply with our customers' specifications and requirements to provide reliable and sustained quality product and services through use of good quality raw materials well defined process controls at each stage of manufacturing and continuous technology up-gradation.
- To insist on a quality work-environment that supports self-respect, team work, motivation and innovation and thus, making quality as an inherent attribute of our organization
- To emphasis and implement the 3R concept: Reduce, Reuse, and Recycle in all possible organization activities.
- To proactively assess health and safety risks, environmental and energy impacts and systematically update, document and implement continual improvement plans
- To provide appropriate training and disseminate information to enable all employees to accept individual responsibility for Quality, Environment, Health and Safety
- To Prevent, eliminate or minimize pollution-causing situations and potential risks that could harm the environment, cause ill health and injury affecting the occupational health and safety of our personnel and external providers.
- To institute and implement a system of regular Quality, Environment, and Health and safety audits in order to assure compliance with regulatory norms, laws, regulations and applicable codes of practice.
- To monitor, document and communicate Quality, Environment, and Health and safety performance in a clear and transparent manner to stakeholders and all other interested parties.

Approved by: Chief Executive Officer
Date: 08.01.2016

Integrated Management Policy gives the integration of Quality Management System (QMS) and Environment Management System (EMS).
